***The Impact of Animal Extinction***

*Animal extinction is a critical issue that affects our planet's biodiversity. As species disappear, ecosystems become imbalanced, and the delicate*

*web of life unravels. In this passage, we'll explore the causes, consequences, and potential solutions to this pressing problem.*

### **Causes of Animal Extinction:**

- *Habitat Destruction: Human activities such as deforestation, urbanization, and agriculture lead to the destruction of natural habitats. When animals lose their homes, they struggle to survive.*
- *Climate Change: Rising temperatures, extreme weather events, and altered ecosystems disrupt the delicate balance that sustains various species. Many animals cannot adapt quickly enough to survive these changes.*
- *Pollution: Pollution from industrial processes, chemicals, and plastics harms both terrestrial and aquatic animals. Contaminated waterways and air quality impact their health and reproductive success.*
- *Overhunting and Overfishing: Unsustainable hunting and fishing practices threaten species like rhinos, elephants, and marine life. Poaching for ivory, fins, or exotic pets pushes animals to the brink of extinction.*
- *Invasive Species: Non-native species introduced by humans can outcompete native animals for resources, leading to their decline.*

### **Solutions:**

- *Conservation Efforts: Protecting habitats, establishing wildlife reserves, and enforcing anti-poaching laws are crucial steps.*
- *Education and Awareness: Educating the public about the importance of biodiversity encourages responsible behavior.*

- *Sustainable Practices: Promoting sustainable agriculture, fishing, and tourism helps reduce the impact on ecosystems.*
- *Research and Technology: Advances in genetics, captive breeding, and habitat restoration aid conservation efforts.*
- *International Cooperation: Global collaboration is essential to address transboundary issues.*

*In conclusion, animal extinction threatens not only individual species but also the delicate balance of life on Earth. By taking collective action, we can protect our planet's rich biodiversity for future generations.*

17. Habitat destruction is one of the causes of animal extinction.

18. Climate change has no impact on various species.

19. Pollution affects both terrestrial and aquatic animals.

20. Overhunting and overfishing threaten species like rhinos, elephants, and marine life.

***Task 5: Read the passage again and answer the question.***

21. Why does habitat destruction cause animal extinction?

22. How does climate change impact various species?

23. What role does pollution play in harming animals?

24. Which unsustainable practices threaten species like rhinos, elephants, and marine life?

25. What is the importance of international cooperation in addressing animal extinction?

**Task 6: Fill in the correct form of words in brackets to complete the passage.**
